

Testometric offer standard test systems for a wide range of paper testing. They include specialized fixtures and software for tensile, tear, peel, compression, puncture, friction and other tests to the following international standards:-

**Tensile:** - ENISO 1924-2, ASTM D828, BS 4415, 2782, DIN 53112, JIS P8115, TAPPI T494

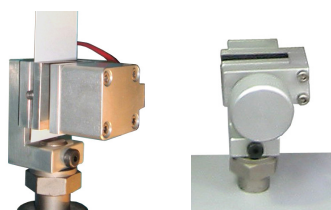

**Tear:-** ASTM D 1938

**Peel:** - ISO 4578, ASTM D903, D3330, D1000, BS 3887, F88

**Compression:** - ISO 9895, BS 7325, DIN 54518, TAPPI T826

**Puncture:-** ISO 3303-A, ASTM D3787, D5748

**Friction:-** ASTM D 1894, BS 2782

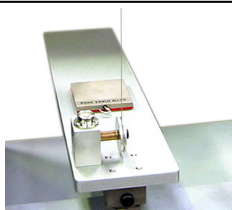

### Tensile Grips

A range of manual and pneumatic grips is available for all types of paper testing.

### Wet Strength Fixture

Special fixtures are available for wet strength testing of paper, tissue etc.

### Friction Grip

Friction slides are available to measure static and dynamic coefficient of friction on paper, films and printed material.

### Zero Span Grip

A special fixture is available for conducting zero gauge length tensile test.
