

# PANTONE® Pantone Color Match Card

PCNCT-CARD, PCNCT-CARD-25

Works with the Pantone Connect Mobile App for Android and iOS

## Overview:

The Pantone Color Match Card works with your phone's camera to measure and match colored objects, materials, and surfaces to a Pantone Color. With the size and portability of a credit card, this unique solution makes matching an inspirational color to Pantone as easy as taking a photo – at accuracy levels approaching more expensive color-reading devices. Use the Color Match Card with the Pantone Connect mobile app to capture a color, search for a best match, and save your chosen Pantone Color to a palette for designing later in the Pantone Connect Extension for Adobe® Creative Cloud®.

- Save time evaluating and selecting the best Pantone Color matches
- Available for purchase as a single card or in quantities of 25
- Works with both free and paid Pantone Connect accounts
- For list of phones compatible with the Color Match Card, visit [pantone.com](http://pantone.com)

## Format:

- Laminated paper-board card material is lightweight and durable
- Comes with a protective sleeve
- Dimensions: 85mm x 55mm x 1mm (similar to a credit card)
- Back of card has a QR code to read color measurements into Pantone Color Systems
- Requires well-lit spaces with minimal overhead glare for best results

## Color:

- Matches to all current Pantone Color Systems (PMS™, FHI, CMYK, Skintone)
- Does not return a quality match with TPM Metallic Shimmers, PMS Metallics, Nylon Brights, or Pantone Plastics
- Colors measured via dual illumination (flash & ambient)

## Product Application:

- For finding best Pantone Color matches to physical colored materials, objects, and surfaces
- Cards can be easily distributed to teams working outside the office, or designers requiring frequent color matching while on the go
- Colors integrate into Pantone Connect mobile, web, and Adobe® Extension for palette creation and designing in Adobe® Creative Cloud® tools
