VeriVide
See in Truth

UltraView

The all-new industry
leading tunable LED
technology by VeriVide

The dawning of a new era in
visual colour assessment with
a game changing all-LED light
booth, for a greater level of
control and repeatability across
your global supply chain.

UltraView opens the door to superior
performance, accuracy and repeatability
between systems.

UltraView's multichannel LED technology and
VeriVide's unique calibration software allows
for point of sale light sources to be kept up to
date with evolving specifications.

LE19 4SD United Kingdom

Manufacture and R&D

Quartz Close, Warrens Business Park,
Enderby, Leicester, LE19 4SG United Kingdom

VeriVide is committed to innovation in
colour assessment and quality control.
From constructing standardised viewing
environments to developing new lighting
products to meet industry standards,
improving your quality and productivity is
always our priority.

VeriVide is BS EN ISO 9001 : 2015 assessed
and registered. All our colour assessment and
measurement equipment is made in the UK. Design
and specification subject to change without notice.

VeriVide Ltd is a company registered in England and
Wales with company number 827815. Registered
Office: VeriVide Ltd, Quartz Close, Warrens Business
Park, Enderby, Leicester, LE19 4SG. United Kingdom.

Suppliers to brands and retailers historically had to
purchase multiple light cabinets to cover different
retailer lighting needs. However, this is no longer the
case due to the developments in technology, suppliers
can now purchase one UltraView and have all their
different principle point of sale light sources pre-
programmed.

Each system is calibrated to precise chromaticity
tolerances, that greatly exceed CIE test methods,
meaning there is no perceivable difference between
systems anywhere in the supply chain.

Point of sale LED lighting

View and assess samples exactly as they appear in
modern LED lit stores. Retail lighting is increasingly
changing to LEDs, replacing old fluorescent lighting.

Features and benefits

- ▶ Highest quality colour matching and colour
evaluation under LED that surpasses all major
standards for visual evaluation, including ASTM,
AATCC, BSI, DIN, SAE and ISO.
- ▶ A rated CIE D65 and D50 illuminants.

- ▶ CIE illuminant A.
- ▶ Multiple POS LED options available, including
pre-programmed as standard: L40-8 (4000K), L35-8
(3500K), L30-8 (3000K) and L31-9 (3100K).
- ▶ VeriVide's new tunable LED technology works to
tighter tolerances than other aftermarket LED
alternatives and avoids concerns with fringing
effects and flickering which will disrupt visual
assessment and the operator's ability to make
accurate colour decisions.
- ▶ VeriVide's filtered ultraviolet LED technology allows
precise assessment of OBA content and tint by
eliminating unwanted visible light.
- ▶ UV toggle on all light sources to bring ultraviolet in
and out of the light source.
- ▶ Easy to navigate touch screen interface.
- ▶ Save time and waste by communicating accurate
colour decisions across your global supply chain.
- ▶ Specified by multiple brands and retailers globally.

Sustainability

- ▶ No need for multiple light booths - UltraView can
have all the different brand switch sets pre-
programmed.
- ▶ No need to regularly replace lamps - annually
calibrate your light booth to maintain the highest
levels of accuracy.
- ▶ Components are designed to be easily and widely
recycled at end of life.
